Direct Hay Weighted Average Report for week ending 6/11/2021

Volume			
	This Week	Last Reported (5/31/2021)	Last Year
Tons:			
Hay	820	875	0
Straw	0	125	0
Total	820	1000	0
Bales:			
Straw	30	150	0
Total	30	150	0

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to last week: Few comparable sales of alfalfa steady to firm. Very good demand exists currently as the drought conditions are creating real concern about the supply of new crop hay. Cold dry weather in May greatly hampered the growth of alfalfa which resulted in reduced tonnage of first cutting. The quality of new hay has been outstanding as the temps were hot and humidity levels low allowing hay to cure quickly. A thunderstorm moved through East River, SD this morning but amounts were not heavy or widespread.
